

Planmeca Compact™ i Classic

The modern classic of dentistry

ENGLISH

PLANMECA

Ease of use and great ergonomics in one complete package

Planmeca Compact™ i Classic is the modern classic of our dental unit range – a functional choice offering all the features and instruments you need for a smooth workflow. Built for comfort and ease of use, it combines the best benefits of our ergonomic and practical design solutions.

Easy to learn, easy to use

Planmeca Compact™ i Classic has been designed for a smooth workflow and superior ease of use. Just like all our dental units, it is equipped with a simple and intuitive touch panel that guides you in your preferred language and lets you adjust all essential unit, instrument and infection control functions. The dental unit and instruments can also be operated directly from the foot control, leaving your hands free for patient treatment.

Ergonomic instrument use

Planmeca Compact i Classic can be equipped with the same comprehensive instrument range as all our dental units. The unit's balanced instrument arms guarantee an ergonomic workflow, since only small movements are needed to use the instruments. This minimises the strain on your arm, wrist and shoulder. The dental unit can also be equipped with hanging tube instruments. The freely interchangeable instruments and easy console movements allow the unit to be swiftly tailored to meet personal preferences.

A relaxing treatment experience for the patient

Planmeca Compact i Classic always supports a relaxing treatment experience – even through longer visits. The chair design follows the shape of the patient's body and provides firm support, while the double-articulated headrest allows comfortable positioning of the patient's head. Armrests can be fitted for additional support. The **Ultra Relax™** upholstery, made of durable artificial leather and viscoelastic memory foam, guarantees extra comfort.

Durable and practical design

We use aluminium parts and an epoxy paint finish in our dental units for ultimate durability. The seamless, powder-coated surfaces and automatic flushing and cleaning programs meet the strictest infection control requirements. The side-lifting chair and small cuspidor base provide maximised legroom for both the dentist and the assistant, with the lean and narrow backrest design further ensuring excellent access to the treatment area.

Instant access to personal settings on any dental unit

The one-of-a-kind **Planmeca PlanID™** sign-in system allows dentists to access their personal settings instantly on any dental unit with a simple flash of a card. This helps clinics utilise their equipment flexibly, since dental units no longer need to be assigned to specific users.

"Planmeca dental units have improved our performance and made our staff more committed to the clinic."
