

Vacuclave 305 - The fastest autoclave in the world!

With DRYtelligence drying and ProControl batch release

Speed through and through, quality all around: With Vacuclave 305 you speed up your workflow: From sterilization to drying through to release. In addition to the product highlights of the Vacuclave 105, you benefit from patented DRYtelligence for optimum drying processes and ProControl for batch release and label printing. This allows you to design your processes with maximum flexibility, efficiency and legal certainty in the smallest possible space.

- ★ The patented DRYtelligence for optimum drying results and **up to 80 % shorter drying times**
- ★ **ProControl for batch release and user authentication** directly on the Smart-Touch display
- ★ **Label printing with MELAprint 80** for complete traceability of the instruments
- ✓ The **large Smart-Touch Display** makes everything easier - from the program selection to the documentation via USB or network
- ✓ **Ready. Set. Installed.** Location-independent plug & play installation thanks to stand-alone device concept
- ✓ Power Save puts the heater and display into energy-saving mode between sterilization processes for **top energy efficiency**
- ✓ Unique MELAG quality - made in Germany **guarantees maximum reliability in everyday practice**

from

6,5 min

Cycle time of a conventional practice autoclave: 40 min

82 % faster cycle times*

60 % less space required*
(Dimensions W x H x D: 30 x 30 x 59 cm)

50 % less weight*

* Compared to a conventional practice autoclave.
