### Course Overview

**Transform your dental practice/lab with cutting-edge 3D printing!**

**This immersive, two-day course combines expert lectures, live demonstrations, and hands-on training with leading dental brands including SprintRay, Asiga, Formlabs, Shining 3D, 3Shape, Medit and Exocad.**

**What You'll Learn:**

- **3D printing workflows for models, splints, crowns, dentures, surgical guides & more**
- **CAD design basics using Exocad, 3Shape, and Medit (hands-on)**
- **Printer operation, slicing, post-processing, and finishing techniques**
- **Explore advanced applications like clear aligners and full dentures**
- **Compare popular systems side-by-side and find the best fit for your clinic**

**Perfect for: Dentists, Lab Technicians, and Digital Dentistry enthusiasts ready to bring 3D printing in-house.**

**Includes: Certificate of completion, live demos, real-world cases, hands-on stations & group photo.**

### About the Speaker

Jeroen Klijnsma is a powerhouse in digital dentistry, with over 20 years of experience driving innovation, helping labs and chairside practices go fully digital.

A trusted global speaker and certified 3Shape trainer, he collaborates with leading manufacturers to stay at the forefront of the latest technologies and materials.

Based in Melbourne, his digital lab and training center features some of the world's most advanced 3D printers.

With a strong presence consulting and training across Europe, US, Asia and Australia, Jeroen supports dental professionals with cutting-edge workflows and insight into the trends shaping the future of dentistry.

# Bring 3D Printing to your Practice

## 2 Day Hands-On Course

### Day 1

#### Foundations & 3D Printing Workflow

##### Introduction to 3D Printing in Dentistry

- What can we 3D print?
- Clinical benefits and case examples
- Overview of supported workflows

##### Basics of 3D Printing Technology

- How 3D printing works: SLA, DLP, LCD (with comparisons)
- Printer setup and calibration
- Print file types and slicing basics

##### Introduction to Dental CAD Design (Hands-On)

- Capturing of Data (IO scanning)
- Overview of CAD software
- Design demo: Basic dental model
- Hands-on: Participants design a simple model
- Hands-on: Participants design a Splint

##### Preparing for Printing (Hands-On)

- Slicing with software
- Print orientation, supports, exposure settings
- Hands-on slicing and file preparation
- Print sample models
- Print designed Splints

### Day 2

#### Post-Processing & Advanced Applications

##### Post-Processing Fundamentals

- Why post-processing matters
- Washing and curing
- Handling resins
- Material compatibility

##### Hands-On Post-Processing

- Wash and cure models
- Visual inspection and curing verification
- Troubleshooting failures or support issues

##### Advanced Printing Applications

- Dentures
- Clear aligner workflow (printed models for thermoforming)
- Surgical Guides
- Instructor demo and rotating hands-on stations per brand

##### Finishing by Hand (Hands-On)

- Support removal and polishing techniques
- Manual finishing
- Finishing a Splint
- Adjustments

##### Wrap-Up & Q&A

- Review: brand-specific strengths and workflows
- Choosing the right printer for your practice
