MIDAS

DENTAL 3D PRINTING HAS NEVER BEEN THIS SMART **AND** SIMPLE.

MEET MIDAS.

The world's first digital restoration press and the simplest and smartest method of 3D printing dental restorations.

Midas is an all-new solution for fabricating restorations chairside. Patented Digital Press Stereolithography combines the tank, resin, and platform into a single capsule, allowing it to print with materials up to 10x more viscous than conventional 3D printers.

EFFORTLESS FABRICATION

Just scan, place, and press – it's as simple as that. Experience no-mess handling with fully enclosed resin capsules. Ready to use right out of the box, with no extensive training required.

VALIDATED MATERIALS

Features SprintRay 510(k) cleared materials

- Ceramic Crown
- Crown HT
- OnX Tough 2

More Midas exclusive restorative materials including new Multi-unit capsules coming soon in 2026

DESIGN IN MINUTES

AI Studio combines the convenience of AI design with the versatility of CAD to create a simple, cloud-based design suite. Designing a restoration with Studio is easy for anyone, while customization options like margin and adaptation adjustments help create a perfect fit.

When you buy Midas, you'll unlock access to AI Studio and unlimited AI designs for one year (\$1,200 value).

A NEW ERA OF DENTAL RESTORATIONS
