From Chairside to Delivery in Minutes

Small Footprint Design

A footprint smaller than your laptop. At just 8.5kg, AccuFab-Aris offers no installation constraints. Place it. Power it on. Start printing.

High-Precision Printing

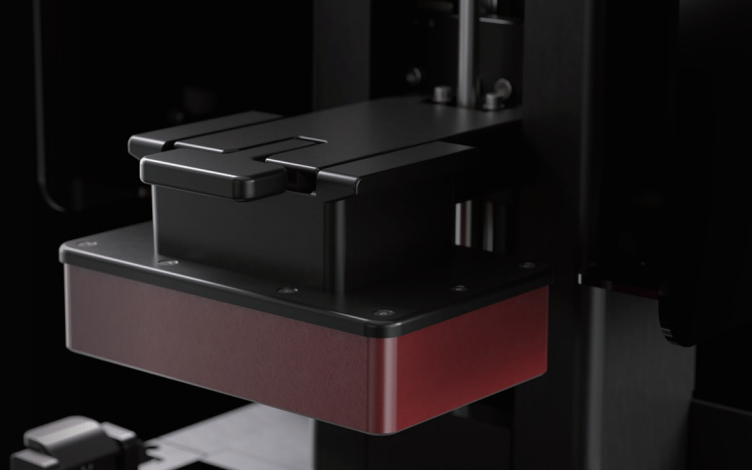

Ultra-fine 34 µm pixel size with 4K high resolution. Delivering reliable dental prints with precise fit and minimal chairside adjustments.

Thermostatic Build Platform

Automatically maintains 30°C to minimize resin warping, reduce print detachment risk, and improve print success rates.

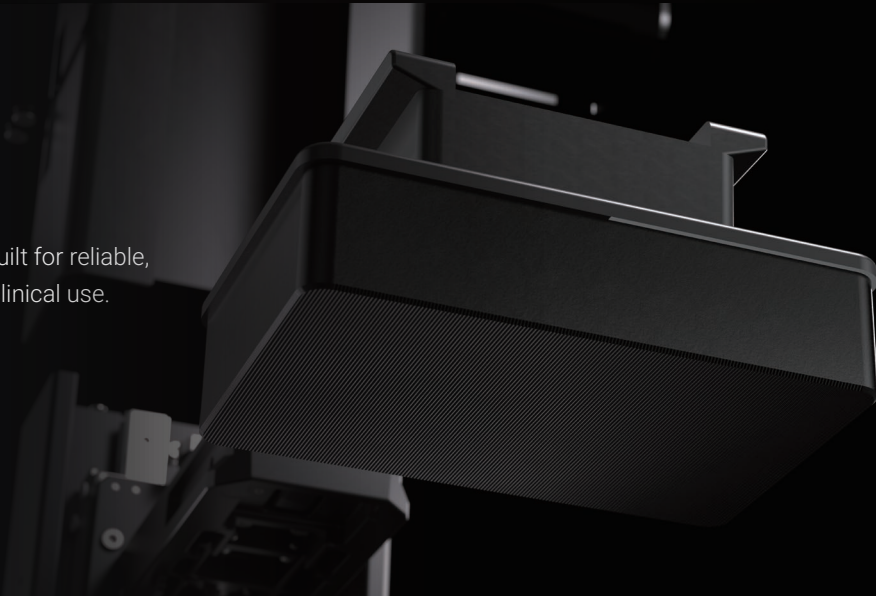

Smart Fail-Safe Sensors

Real-time residue and tank (NFC) detection automatically prevent operational mistakes and protect your hardware from damage.

Exceptional Durability

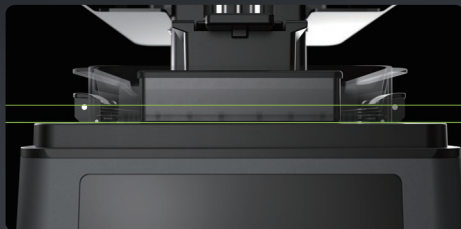

Hard-anodized aluminum platform built for reliable, long-term performance in everyday clinical use.

Just print it

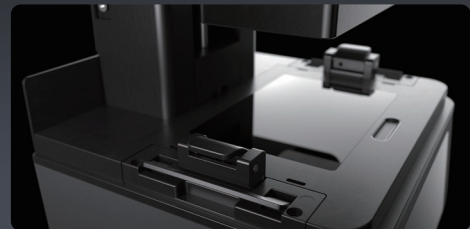

Everything complex is already handled in advance.

No steep learning curve. No complicated setups.

Auto-leveling Made Easy

One-click auto-leveling and automatic Z-axis calibration at startup handle the setup for you. Ready to use right out of the box.

10-Second Quick Maintenance

Replacing the quick-release screen is as easy as making capsule coffee: Remove, Place, Lock—in as little as 10 seconds.

Maintenance Made Simple

Flexible Connectivity Options

Smoothly integrate into your digital dental workflow with flexible USB, Wi-Fi, and Ethernet connectivity.

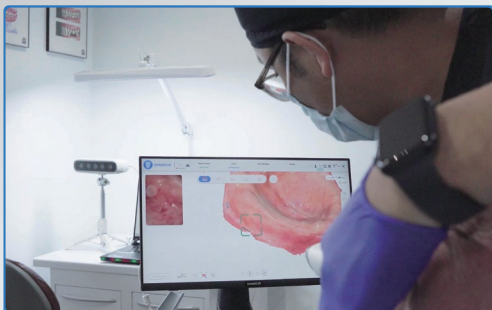

Aris Health Dashboard

A visual dashboard monitors resin tank and screen status in real time, ensuring timely maintenance and stable performance.

Powered by SHINING Flow

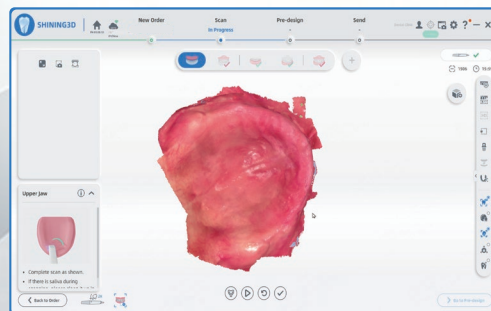

SHINING FLOW is a unified digital workflow for dentistry, integrating scanning, AI-powered and expert-supported design services, and dental

1

Intraoral & Facial Scan

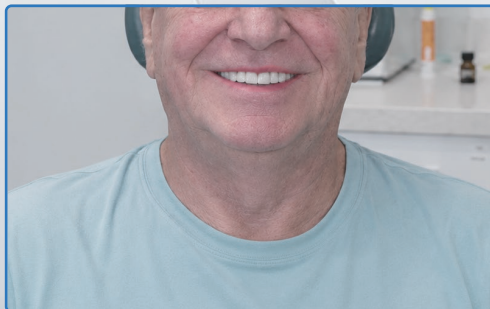

Acquire precise intraoral data for the edentulous arches. Combine this with facial scanning for optimal occlusion and jaw relationship.

2

Cloud Order Management

Scan data automatically uploads to the SHINING 3D Dental Cloud. Access patient orders instantly and eliminate the hassle of manual file transfers.

7

Efficient Delivery

Deliver a functional, aesthetic removable denture, restoring patient smile and comfort efficiently.

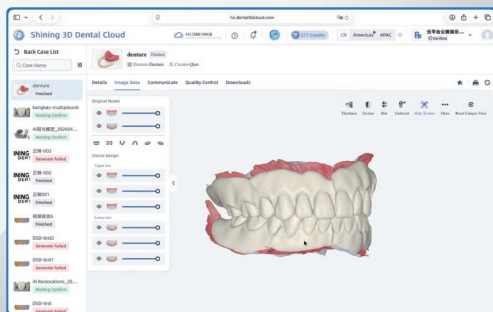

6

Try-In & Adjustment

Evaluate fit and occlusion, and make any necessary adjustments required thanks to the digital workflow.

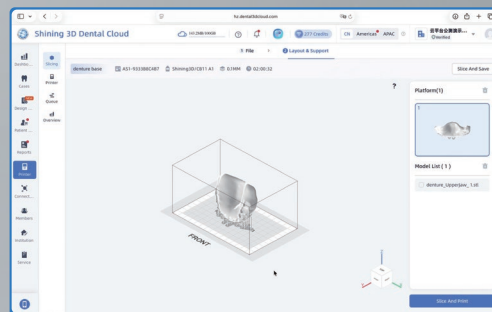

3D printing into one seamless system.

3

SHINING Classic Design

Route your order to the expert-validated Classic Design service for precise denture anatomy and fit.

4

Automatic Cloud Nesting

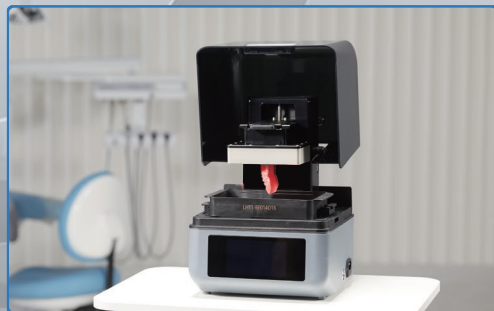

The cloud platform handles nesting, orientation, and slicing, generating print-ready files with optimized supports and layout.

5

Adjustment

on chairside with minimal
steps to digital accuracy.

5

One-Click Printing

Send the nested and sliced file to AccuFab-Aris
online with one-click.

Go Digital with SHINING Flow

Complete digital solutions for chairside dentistry, covering All-on-X, crown and bridge, dentures, orthodontics, and standard implant restorations.

As part of SHINING FLOW, AccuFab-Aris integrates smoothly into daily clinic operations, minimizing software switching and streamlining design-to-print workflows for a more connected experience.

Faster turnover, fewer visits, and happier patients — all from one powerful device.

Technical Specifications

AccuFab-Aris

Weight	< 10KG
Printer Size	257 × 236 x 364 mm
Printing Platform Size	130 x 80 mm
Pixel Size	34 μm
Print Speed	60 mm/h
Layer Thickness	50 - 125 μm (Adjustable)
Connectivity	USB / Wi-Fi / Ethernet
Platform Material	Anodized Aluminum
Resin Tank Volume	200 mL
Platform Heating	✓
Resin Tank (NFC) Detection	✓
Residue Detection	✓
