 HENRY SCHEIN®
BRAND PRODUCTS

CROSSTEX®
A CANTEL MEDICAL COMPANY

From sterilisers and washer disinfectors to waterline maintenance and suction system care, Henry Schein have the products that help keep your practice safe, compliant and operating at its best.

Our Sterilisers

Choose the right steriliser for your practice

While all compliant autoclaves effectively sterilise instruments, key differences between brands lie in efficiency, traceability, connectivity, usability, and support. MELAG is known for fast cycle times, fresh-water systems and comprehensive documentation. MOCOM combines strong sterilisation performance with user-friendly operation and integrated traceability. SCICAN is recognised for compact sterilisers that enable rapid processing of handpieces and instruments.

Fast. Flexible. SciCan

Rapid & Compact	
Unwrapped cycle	6 min*
Wrapped cycle	14 min*
Rubber/Plastic	20 min*
• Capacity for up to 5 pouches • Fresh water for every cycle • G4 connectivity and cycle data	

\$10,620
SciCan STATIM 2000 G4

More Cassette Capacity	
Unwrapped cycle	9 min*
Wrapped cycle	17.5 min*
Rubber/Plastic	45 min*
• Capacity for up to 12 pouches • Radiant drying with drying plates • G4 connectivity and cycle data	

\$12,130
SciCan STATIM 5000 G4

*STATIM total cycle times exclude drying. Cycle times and capacity depend on model, voltage, selected program and load.

Match your instrument flow to the right SciCan solution.

- Need fast turnaround for smaller loads? **STATIM 2000 G4**
- Is larger cassette capacity and drying flexibility a requirement? **STATIM 5000 G4**

The right steriliser for every practice

From rapid instrument turnaround to high-capacity performance, MELAG offers a smart Class B solution to suit your workflow.

MELAG

Compact speed		
5 L chamber	From 6.5 min*	2 trays
• Space-saving tabletop design • Ideal as a dedicated fast-cycle or companion steriliser		

\$8,000
MELAG Vacuclave 105

Everyday value		
17 L chamber	Up to 8 kg	Prime Line
• Smart-Touch operation • DRYtelligence load-adaptive drying and digital documentation

MELAG Vacuclave 318

More capacity		
23 L chamber	Up to 8 kg	Prime Line
• Greater chamber capacity • ProControl batch approval plus USB and network interfaces		

\$15,500
MELAG Vacuclave 323

XL Chamber		
50 L chamber	Up to 25 kg	Up to 16 trays
• XL Chamber with double-jacket technology • Smart-Touch display • DRYtelligence shortens drying time by up to 80%		

\$35,000
MELAG Vacuclave 550

*Cycle time excludes drying and depends on the selected program and load. Product availability and configuration may vary.

Which MELAG model is right for you?

- Need the fastest compact option? **Vacuclave 105**
- Want an everyday Class B workhorse? **Vacuclave 318**
- Need more chamber space? **Vacuclave 323**
- Need maximum capacity and efficiency for a busy practice? **Vacuclave 550**

One range. Three levels of performance.

Choose the chamber size and level of automation that best fits your practice workflow.

From
\$11,912
Mocom B Classic GEN3

Built for everyday reliability

Cycle time vary by program
17L / 22L / 28L
• Cycle reports saved internally • USB or Di.V.A. cloud export • Integrated Wi-Fi

From
\$14,182
Mocom B Futura GEN3

Connected convenience

B-cycle time from 31 minutes*
17L / 22L / 28L
• 5-inch colour touchscreen • Integrated Demineralisation Filter • Modular Drying function adjusts to match actual load

From
\$17,586
Mocom Supreme GEN3

Premium sustainability

B-cycle time from 31 minutes*
17L / 22L / 28L
• 50 cycles with 5 L mains water • Recovers water for later cycles • No demineralised water storage

*Cycle times depend on programme, chamber size, load, drying selection and operating conditions.
31-minutes is the manufacturer-published complete B-cycle time for B Futura and Supreme. Always follow the manufacturer's instructions for use and applicable local standards.

Find the right MOCOM for your steri room.

- Value - Choose the B Classic for straightforward performance with flexible chamber sizes.
- Connectivity - Choose B Futura for guided operation, mains-water and advanced traceability.
- Sustainability - Choose Supreme for premium automation and water recovery.

Our Washer Disinfectors

Find the right instrument reprocessing solution for your practice

The best washer disinfector depends on your practice size, instrument throughput requirements and preferred level of automation. Compare three leading solutions designed to improve efficiency and support validated reprocessing workflows.

\$11,190
Mocom Tethys H10 Plus

Capacity/Throughput
2 kg load capacity with 6L effective tank volume. Full process completed in approximately 35 minutes.
Key Features
All-in-one automated workflow, compact benchtop design, HEPA filtration, and integrated Ethernet and USB connectivity.
Best Suited For
Small to medium practices seeking a compact, highly automated solution that eliminates separate ultrasonic cleaning.

SciCan

Now only
\$10,000
Save \$2,500
SciCan HYDRIM C61 G4

Capacity/Throughput
Capacity for up to 6 x full-size cassettes or 120 instruments per cycle, completed in approximately 40 minutes from start to dry.
Key Features
Built-in dryer, liquid detergent dosing, G4 connectivity, Wi-Fi, USB data logging and remote support capability.
Best Suited For
Any dental practice looking for a reliable, validated washer disinfector with excellent ease of use.

MELAG

Now only
\$22,870
Save \$1,500
Melag MELAtherm 10 Evolution

Capacity/Throughput
Designed for high-volume practices, with the capacity to process instruments for up to 45 patients or 23 handpieces in a single cycle.
Key Features
AquaBoost technology, active drying, Smart-Touch display, ProControl batch approval, integrated documentation and process agents.
Best Suited For
Busy general practices, specialist clinics, and multi-chair surgeries seeking maximum workflow efficiency, capacity and traceability.

Dental Unit Waterlines

Adopt a waterline treatment protocol that works for your practice
